---

## Summary

User-focused and results-oriented Software Engineer who turns complex challenges into simple, smart solutions —bridging user needs with technical precision. Experienced in overseeing software operations and collaborating with cross-functional teams to ensure optimal site performance. Strong ability to work both independently and in structured organisations and contribute effectively to project success.

## Experience

---

### Lead Software Engineer

December 2022–September 2024

ABOSEDEAINA CHARITY FOUNDATION, Lagos, Nigeria

- Led development initiatives for the foundation's website, ensuring timely project completion and high-quality deliverables.
- Directed the maintenance and operational integrity of the foundation's Django-based website, ensuring continuous availability and proper functioning.
- Collaborated with cross-functional teams to enhance site performance and optimize user experience.

### Backend Lead and Project Coordinator

October 2023–April 2024

TPOB INITIATIVE - ZIONNET, Canada

- Worked on the backend API for Zionnet, a platform that allows people to sell and buy products that interest them, create business listings, list businesses for potential buyers, acquire loans for their businesses, post and apply for jobs, invest, amongst other outstanding features.
- Solely reviewed and merged over 70% of the entire backend codebase, carrying out QA checks every time.
- Employed the use of a task tracking spreadsheet, in addition to GitHub issues, to handle task assignments across teams. Also employed the use of multiple spreadsheets, as an orderly and organised means of collection and storage of team member information.
- Presided over regular meetings to discuss project goals and tasks, mostly utilizing Google meet.

### Finalist Intern

September 2023–October 2023

HNGx INTERNSHIPS, Remote

- Consistently met tight time frames for personal tasks.
- Successfully completed group tasks, including the creation and monitoring of APIs for frontend consumption amongst others.
- Achieved the status of finalist in the backend development category, ranking in the **top 1%** of candidates out of **22,000+** registered participants.

## Skills

---
